

Open Letter to Potential Supporters of Jill Stein or Cornel West

Dear friends of the environment,

On behalf of the climate and our environment, we are asking you to vote for the Harris-Walz ticket as it represents our best chance at making more progress over the next four years.

As we watch the destruction and tragedy unfold after Hurricanes Helene and Milton, there is only one candidate in the presidential election who has a track record of addressing climate change: Vice President Kamala Harris.

Harris is a climate and justice leader with two decades of public service on the frontlines of needed progress and change. She's been a driving force in delivering the strongest climate action in history, and she's ready to build on those gains from day one as president.

Two years ago this summer, Harris cast the tie-breaking vote that secured U.S. Senate passage of the strongest climate action in history – climate and clean energy incentives worth at least \$370 billion over 10 years in the Inflation Reduction Act. She has also been a driving force to ensure that the solutions are equitable and address the unfair pollution and health burdens that our nation's front-line communities have suffered.

Harris has worked for environmental justice for two decades, starting after she was elected district attorney for San Francisco and, later, attorney general for California. She created one of the first environmental justice units in San Francisco and held oil companies and automakers accountable for their pollution.

Former President Trump, on the other hand, waged the worst White House attack ever against the environment and public health while in office. And he has made clear that his second term will be even more extreme, drawing from the detailed anti-environment proposals and plans contained in Project 2025. Every vote for Dr. Jill Stein or Cornel West instead of Kamala Harris makes it more likely that Donald Trump will win.

We share your commitment to a safe and healthy environment for all and thank Stein and West for raising important issues in this election, but Vice President Harris is the only candidate with a record of success addressing climate change. Please join us in voting for the Harris-Walz ticket and against the Trump-Vance pro-polluter ticket.

Sincerely,
